Lab # 10 Takahiro Mitsuhashi 100308877

CPSC 1150 - 003 Instructor: H. Darbandi Lab Title:Practice File Input and Output and arrays of Strings

Formula Lab Date submitted: July 23th Department: CSIS

Program Lab9 File Name: Lab10.java :Purpose: sort the line of text file in alphabet (You should fill the following information based on compiler and computer you are using). Compiler:Java SDk version 10.0.1

Computer: something like ::Intel(R)Core(™)i5-6300U CPU 2.40GHz 2.50GHz ,4.00GB

Operating System: 64-bit Operating System,x64-based processor(Windows10)

Language: Java

Program Logic (Pseudocode) Algorithm:Call the file.then Scan each word and store them in an arrary, and compare the array START

1.File mylnFile ←new File(sFileName)Scanner input←new Scanner(mylnFile)2.

k←0 integer while input.next()

tmp←input.next() Arr[k]←tmp K←k+1

3. a**←"**"

4.

PRINT arr

5. call the printFile(input) in Main method

Generate your test cases based on the specifications in your lab assignment. Follow following format for each test case:

Test Case1:

"Hello, "I'm "Java "Java1.5 "new" '+' '+' **'**+' **'+'** '+' '+' (in (most (such // 1.5

> = A
